

ISE CERTIFICATION COURSE DETAILS

NAME:	PRATHVI P SHETTY	USN:	4AL16IS037
SEMESTER:	8	MENTOR:	Mrs..JAISHMA KUMARI
COURSE NAME:	LEARN APPLICATION DEVELOPMENT PROGRAM	DATE:	21/05/2020

SCREENSHOT:

BRIEF REPORT: (POINT-WISE)

- 1). Android Explicit Intent: Android Explicit intent specifies the component to be invoked from activity. In other words, we can call another activity in android by explicit intent. We can also pass the information from one activity to another using explicit intent.
- 2). Android Explicit Intent: Android Explicit intent specifies the component to be invoked from activity. In other words, we can call another activity in android by explicit intent. We can also pass the information from one activity to another using explicit intent.
- 3). Vector Assets: When it comes to scalable image, SVG (Scalable Vector Graphics) is the standard around the web, and it uses arbitrary JavaScript to add animation. But SVGs are not appropriate for constrained mobile devices. But android does support SVG's path specification in form of vector drawable.
