

ISE CERTIFICATION COURSE DETAILS

NAME:	SHETTY ASHIKA C	USN:	4AL16IS050
SEMESTER:	8	MENTOR:	Mr. SHARAN PAIS
COURSE NAME:	C++ programming for beginners to ultimate level	DATE:	10/6/2020

SCREENSHOT:

BRIEF REPORT: (POINT-WISE)

- 1). C++ Modifier Types. C++ allows the char, int, and double data types to have modifiers preceding them.
- 2). A modifier is used to alter the meaning of the base type so that it more precisely fits the needs of various situations. The modifiers signed, unsigned, long, and short can be applied to integer base types.
- 3). In C++, special words(called modifiers) can be used to modify the meaning of the predefined built-in data types and expand them to a much larger set.
