

ISE CERTIFICATION COURSE DETAILS

NAME:	PRATHVI P SHETTY	USN:	4AL16IS037
SEMESTER:	8	MENTOR:	Mrs. JAISHMA KUMARI
COURSE NAME:	COMPLETE MACHINE LEARNING WITH R STUDIO	DATE:	11/6/2020

SCREENSHOT:

BRIEF REPORT: (POINT-WISE)

- 1). The way a business gathers, shares and exploits this knowledge can be central to its ability to develop successfully. This doesn't just apply to huge multinational companies. Knowledge management can benefit everyone from a local newsstand to a manufacturing firm.
- 2). Data exploration is an approach similar to initial data analysis, whereby a data analyst uses visual exploration to understand what is in a dataset and the characteristics of the data, rather than through traditional data management systems.
- 3). A data dictionary is a file or a set of files that contains a database's metadata. The data dictionary contains records about other objects in the database, such as data ownership, data relationships to other objects, and other data. The data dictionary is a crucial component of any relational database.
