BRIEF REPORT: (POINT-WISE)

- 1). Collection of objects** is called class. It is a logical entity. When one object acquires all the properties and behaviours of parent object i.e. **known as inheritance**. It provides **code reusability**. It is used to achieve **runtime polymorphism**.
- 2). OOPs** makes development and maintenance easier where as in **Procedure-oriented programming language** it is not easy to manage if code grows as project size grows.
- 3). OOPs** provide **data hiding** whereas in **Procedure-oriented programming language** a global data can be accessed from anywhere.
