

ISE CERTIFICATION COURSE DETAILS

NAME:	SHETTY ASHIKA C	USN:	4AL16IS050
SEMESTER:	8	MENTOR:	Mr. SHARAN PAIS
COURSE NAME:	C++ programming for beginners to ultimate level	DATE:	11/6/2020

SCREENSHOT:

BRIEF REPORT: (POINT-WISE)

- 1). C++ polymorphism means that a call to a member function will cause a different function to be executed depending on the type of object that invokes the function.
- 2). You have different classes with a function of the same name, and even the same parameters, but with different implementations.
- 3). In simple words, we can define polymorphism as the ability of a message to be displayed in more than one form.
